Subject: Significant Net Emissions Increase

Jenny and Dan-

We're going to have to think about how much information we give USG on this. Normally we don't give out or emissions calcs, but we may need to provide more information than normal here. I'm thinking of addressing it in general terms-talk about the production increase, and the amount of SO2 associated with this, and then state that this resulted in a Significant Net Emissions Increase.

How does that sound? I'll run it by Chuck and Eric as well.

Thanks.

John
